JUHUN PARK

202-924-4546 | juhunpark32@gmail.com | juhun-park.web.app | LinkedIn | GitHub

TECHNICAL SKILLS

• Programming Languages: Python, Java, SQL, JavaScript

• Frameworks: React.js, Flask, Bootstrap, Django, Pandas, Numpy, PostgreSQL, MediaPipe, Tailwind

• Technologies: Git, Linux, Docker, Firebase, GCP

EDUCATION

George Mason University Fairfax, VA

BS Computer Science, ADVANCE Program

Expected May 2027

Northern Virginia Community College

Annandale, VA

AS Computer Science, GPA: 3.9; Dean's List '23, '24; Presidential Scholar '24

Expected May 2025

Relevant Courses: Problem Solving & Programming, Object Oriented Programming, Data Structures & Algorithms, Calculus I/II/III

EXPERIENCE

InsightLegi DataStorm January 2024 – Present

Software Engineer Intern

Remote

• Developed a static website using **React** and **Bootstrap** to promote InsightLegi DataStorm 2025, including event details.

Eduverse December 2024 – Present

Software Engineer Intern

Remote

- Created search endpoint using Django ORM, PostgreSQL to query profiles and posts with filters for names, skills and post types, optimized React integration efficiency by 50%, reducing search query response time by 20%.
- Redesigned the frontend using React and Bootstrap, resulting in 57% reduction in page load time, 35% decrease in API fetch time.
- Collaborated as a team of 5 on API testing using Postman and cURL, achieved 98% accuracy for profile and post-related features.

Himedia Academy

January 2023 – April 2023

Full-stack Developer Apprenticeship

Seoul, South Korea

- Built web applications as full-time OJT using Git, HTML/CSS, JavaScript, Bootstrap and Oracle DBMS, aquired SDLC knowledge.
- Implemented backend features utilizing Object-oriented programming, data structures and algorithms, unit testing and debugging.

PROJECTS

Project Verstappen | GitHub | Python, Shared Memory API, OpenCV, AC/acsys module

2024

- Engineered a real-time telemetry data analysis solution for sim racers with reduced costs by 30%, increased user ingagement with telemetry data by 70% by providing more approchable UI/UX for information with steep learning curve.
- Utilized OpenCV to develop, implement advanced image processing pipelines for accurate track line extraction and lane detection.

FO Statistics | GitHub | Flask, React, Tailwind CSS, OpenF1 API, FastF1 API, Firebase, Docker, GCP

2024

- Architected a robust backend API using Flask to fetch, filter data from the OpenF1 and FastF1 APIs, for 100+ data tables and graphs.
- Designed and developed an intuitive and user-friendly interface and interactive frontend using React and Tailwind CSS, providing users with seamless navigation through updated driver/constructor standings and comprehensive grand prix statistics.
- Deployed a production-ready backend API with 99% uptime on Google Cloud Run utilizing Docker for containerization and leveraged Firebase for secure and 30% more cost efficient hosting of the React frontend compared to previous deployment.

EXTRACURRICULAR ACTIVITIES

CodePath Technical Interview Prep Course - TIP102 | Certificate

May 2024 - August 2024

- Improved problem-solving skills of data structures and algorithms of heaps, trees, linked lists and hashmap through 60+ problems.
- Enhanced communication and analytical thinking skills by collaborating with 5 team members from various cultural backgrounds.
